

RULES AND REGULATIONS (RENEWABLE ENERGY - JUNIORS)

Eligibility Criteria:

- Participant Eligibility: Only school students from classes 6th to 10th are eligible to participate.

Team Composition:

- Each team must consist of 2 or 4 members (Odd-numbered team participation is not allowed).

Project Requirements:

- Projects should focus on addressing agricultural challenges using any one renewable energy source (solar, wind, or hydro).
- The project must not exceed 50 cm x 50 cm (L x B) in dimensions.

Design and Construction:

- Limited components and decorative items are permitted to maintain simplicity and relevance. Teams must bring their own tools for development and assembly of the project during the zonal level.
- In the finals, teams must present upgraded versions of their projects developed during the zonal level, adhering to the size limit of 50 x 50 cm (L x B), showcasing improvements and refinements.
- Only 3 hours of time will be given to design and develop the projects.
- Each team should bring one laptop to present a PowerPoint presentation to the judges, clearly explaining their project's design, function, and benefits.

Judging and Selection:

- Judges' decisions are final; any disputes or disruptions can lead to immediate disqualification to maintain a fair and respectful environment.
- Projects will be evaluated based on presentation skills and the functionality of the project.

NOTE: Teams are responsible for the safety and compliance of their projects with competition guidelines, ensuring a secure and smooth event.
