RULES AND REGULATIONS (IOT - SENIORS)

Eligibility Criteria:

- Participant Eligibility: Diploma, Degree, B. Tech students are eligible to participate.

Team Composition:

- Each team must consist of 2/3/4 members.

Participation and Development:

- Ready-made projects or devices are not allowed. All designs must be original and created by the participants.

- Teams must ensure that any simulation software needed is preinstalled on their laptops.

- The management is not responsible for any faults occurring in software simulations or hardware.

- Teams must bring their own components, tools and equipment for hardware development during the final level.

- Projects should aim to solve agricultural challenges using IoT technology. The final hardware must be portable.

- In the finals, teams must present the completed hardware of their IoT device. Each team should bring one laptop for a PowerPoint presentation.

Judging and Selection:

- Judges' decisions are final; any disputes or disruptions can lead to immediate disqualification to maintain a fair and respectful environment.

- Judges will assess projects based on the functionality and portability of the IoT device, as well as presentation skills.

NOTE: Teams are responsible for the safety and compliance of their projects with competition guidelines, ensuring a secure and smooth event.
